ADDITIONAL INFORMATION SUPPORTING NJD (e.g., paragraph 1 – site conditions; paragraphs 2-3 – rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 – site information on waters of the U.S. occurring onsite): 1.The proposed project is to install a rural water pipeline that will cross 3 nonjurisdictional wetlands and 14 jurisdictional WUS. The area of fill be returned to the original grade (i.e. trench/backfill). The area is a rural prairie setting and is experiencing normal rainfall. 2. NWI maps and the wetland delineation report from the applicant were used to make the jurisdictional determinations. The areas have no potential for ICC navigation. The wetlands have no potential and have not had potential for interstate commerce.
